

# CARE 4 ALL CALIFORNIA

California has made the nation's largest gains in health coverage thanks to our bold approach to implementing and building upon the Affordable Care Act (ACA). Our health care system is stronger today because California went beyond the ACA to protect patients, control health care costs, and improve quality and equity.

We still have work to do. Together, we can ensure every person in California has access to affordable health care coverage and can count on our health care system to deliver the quality, equitable care they deserve.

Care4All California, established in 2018, is a broad-based grassroots campaign to achieve universal health care in California and raise the bar for the nation.

Care4All California includes consumer, community, labor, progressive, and health care organizations working together to attain:

**Universal coverage** - by protecting current coverage gains and expanding Californians' access to health care regardless of their immigration status, age, disability, income, or other factors.

**Affordable coverage** - with increased financial assistance in Covered California to reduce premiums and out of pocket costs, so no Californian pays more than a certain percent of their income for their health care coverage.

**Improved health outcomes and a reduction in disparities** - by requiring insurers to meet new goals centered on consumers' needs, rather than profits.

**Lower costs for consumers** - by holding hospitals, health plans, and drug companies accountable for fair prices.

The Care4All California policy agenda is aspirational but also achievable. California can make significant progress toward universal coverage even without federal approval. See our policy priorities at [care4allca.org](http://care4allca.org)

# CARE 4 ALL CALIFORNIA

Join our campaign to ensure access to quality, affordable, and equitable health care for all Californians!
